

Matrix Theory

09 Linear Independence, Basis, and Dimension

Dr. Konda Reddy Mopuri
Dept. of AI, IIT Hyderabad
July-Nov 2026

From the last class

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$

From the last class

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$
- Gave r pivot rows and r pivot columns

From the last class

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$
- Gave r pivot rows and r pivot columns
- Null space is combination of $n - r$ special solutions

From the last class

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$
- Gave r pivot rows and r pivot columns
- Null space is combination of $n - r$ special solutions
- $m - r$ solvability constraints on $b/c/d$

$$A_{m \times n}$$

$$\begin{matrix} \vdots \\ \vdots \\ \vdots \\ \vdots \\ \vdots \end{matrix} \left[\begin{array}{ccc|c} \vdots & \vdots & \vdots & \vdots \\ \vdots & \vdots & \vdots & \vdots \\ \vdots & \vdots & \vdots & \vdots \\ \vdots & \vdots & \vdots & \vdots \\ \vdots & \vdots & \vdots & \vdots \end{array} \right] \quad \underline{\underline{0}}$$

$$m-r \left\{ \begin{array}{l} \vdots \\ \vdots \\ \vdots \end{array} \right.$$

From the last class

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$A_{m \times n}$

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$
- Gave r pivot rows and r pivot columns
- Null space is combination of $n - r$ special solutions
- $m - r$ solvability constraints on $b/c/d$
- The rank of those matrices (A, U, R) is r

Going forward

- Elimination reduces $Ax = b$ to $Ux = c$ and $Rx = d$
- Gave r pivot rows and r pivot columns
- Null space is combination of $n - r$ special solutions
- $m - r$ solvability constraints on $b/c/d$
- The rank of those matrices (A, U, R) is r

Rank r is crucial!

True size of the system

$$A = \begin{bmatrix} 1 & 3 & 3 & 2 \\ 2 & 6 & 9 & 7 \\ -1 & -3 & 3 & 4 \end{bmatrix}$$

- m and n do not give the complete picture

True size of the system

$$A = \begin{bmatrix} 1 & 3 & 3 & 2 \\ 2 & 6 & 9 & 7 \\ -1 & -3 & 3 & 4 \end{bmatrix}$$

$$R_3 = 2R_2 - 5R_1$$

$$U = \begin{bmatrix} 1 & 3 & 3 & 2 \\ 0 & 0 & 3 & 3 \\ 0 & 0 & 0 & 0 \end{bmatrix}$$

- m and n do not give the complete picture
- We have seen R_3 is a combination of R_1 and R_2 (elimination led to zero row)

True size of the system

$$A = \begin{bmatrix} 1 & 3 & 3 & 2 \\ 2 & 6 & 9 & 7 \\ -1 & -3 & 3 & 4 \end{bmatrix}$$

Handwritten annotations in red: 'C' above the first column, 'X' above the second column, 'C' above the third column, and '4' above the fourth column. A red line is drawn under the first column, a red 'X' is drawn under the second column, and a red arrow points up to the third column.

- m and n do not give the complete picture
- We have seen R_3 is a combination of R_1 and R_2 (elimination led to zero row)
- Columns also failed to be independent; $C(A)$ became 2D plane

True size of the system

$$A = \begin{bmatrix} 1 & 3 & 3 & 2 \\ 2 & 6 & 9 & 7 \\ -1 & -3 & 3 & 4 \end{bmatrix}$$

- m and n do not give the complete picture
- We have seen R_3 is a combination of R_1 and R_2 (elimination led to zero row)
- Columns also failed to be independent; $C(A)$ became $2D$ plane
- Rank (true size) emerges to be an important number!

Rank: computational definition

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$$A \xrightarrow{E} U$$

- Number of pivots in the elimination process

Rank: computational definition

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Number of pivots in the elimination process
- Number of nonzero rows in U

Rank: computational definition

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Number of pivots in the elimination process
- Number of nonzero rows in U

Rank counts the number of independent rows in the matrix!

Linear Independence

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

Given a set of vectors $v_1, v_2, \dots, v_n$, and if their combination $c_1 v_1 + c_2 v_2 + \dots + c_n v_n = 0$ only when $c_1 = c_2 = \dots = c_n = 0$, then the vectors $v_1, v_2, \dots, v_n$ are linearly independent.

Linear Independence

Given a set of vectors, $v_1, v_2, \dots, v_n$, and if their combination $c_1v_1 + c_2v_2 + \dots + c_nv_n = 0$ only when $c_1 = c_2 = \dots = c_n = 0$, then the vectors $v_1, v_2, \dots, v_n$ are linearly independent.

And if any $c_i \neq 0$, the vectors are dependent. One vector is a combination of others!

Linear Independence

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

A collection is linearly independent when every vector contributes something that cannot be produced by the others.

Example-1

- If any $v_i = \bar{0}$, the set is linearly dependent

$$\{v_1, v_2, \dots, v_n\}$$

↓

$$\underline{3 \cdot \bar{0}} + \underline{0 \cdot v_2} + \dots + \underline{0 \cdot v_n} = 0$$

↑ dependent

Example-2

• Columns $\begin{bmatrix} 1 \\ 0 \end{bmatrix}$ and $\begin{bmatrix} 1 \\ 1 \end{bmatrix}$ ✓

• Columns $\begin{bmatrix} 1 \\ 2 \end{bmatrix}$ and $\begin{bmatrix} 3 \\ 6 \end{bmatrix}$

$$c_1 \begin{bmatrix} 1 \\ 0 \end{bmatrix} + c_2 \begin{bmatrix} 1 \\ 1 \end{bmatrix} = 0$$

$$c_1 + c_2 = 0 \quad c_1 = 0$$

$$c_2 = 0$$

$$c_1 \begin{bmatrix} 1 \\ 2 \end{bmatrix} + c_2 \begin{bmatrix} 3 \\ 6 \end{bmatrix} = 0$$

$$c_1 + 3c_2 = 0 \Rightarrow c_1 = -3c_2$$

$$2c_1 + 6c_2 = 0$$

$$(-3, 1) \quad (-6, 2)$$

✗

Example-3

- Columns $\begin{bmatrix} 1 \\ 0 \\ 1 \end{bmatrix}$, $\begin{bmatrix} 0 \\ 1 \\ 1 \end{bmatrix}$ and $\begin{bmatrix} 1 \\ 1 \\ 2 \end{bmatrix}$

$$\cancel{v_1 + v_2} = \cancel{v_3}$$

$$[1 \ 1 \ 1]$$

Combination $\iff$ Dependent

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$$\sum_{i=1}^n c_i v_i = 0$$

not all
 $c_i = 0$

A set of vectors is dependent iff at least one vector can be written as a combination of the others.

$$v_i = \sum_{j=1(\neq i)}^n c_j v_j$$

$$-1 \cdot v_i + \sum_{j=1(\neq i)}^n c_j v_j = 0$$

Independence and Null space

- Put the vectors into the columns of a matrix

$$\begin{bmatrix} \vdots & \vdots & & \vdots \\ v_1 & v_2 & \dots & v_n \\ \vdots & \vdots & & \vdots \end{bmatrix}$$

Independence and Null space

- Put the vectors into the columns of a matrix

$$\begin{bmatrix} \vdots & \vdots & \dots & \vdots \\ v_1 & v_2 & \dots & v_n \\ \vdots & \vdots & \dots & \vdots \end{bmatrix}_{m \times n}$$

- $Ax = x_1 v_1 + x_2 v_2 + \dots + x_n v_n = \vec{0}$

$\vec{v}_1$ $\vec{v}_2$
0

$N(A)$

$$\{x \in \mathbb{R}^n : Ax = \underline{0}\}$$

$$\underline{\{0\}}$$

Independence and Null space

- Put the vectors into the columns of a matrix $\begin{bmatrix} \vdots & \vdots & \dots & \vdots \\ v_1 & v_2 & \dots & v_n \\ \vdots & \vdots & \dots & \vdots \end{bmatrix}$
- $Ax = x_1v_1 + x_2v_2 + \dots + x_nv_n$
- Vectors are independent $\iff Ax = 0$ has only $x = 0$

Echelon Matrix

- r nonzero rows are independent

$$c_1 \begin{bmatrix} 1 \\ 0 \end{bmatrix} + c_2 \begin{bmatrix} -2 \\ 1 \end{bmatrix} = 0$$

$$c_2 = 0$$

$$c_1 = 0$$

$$c_1 = 0$$

$$c_1 (1, -2)$$

$$c_2 (0, 1)$$

$$c_1 - 2c_1 + c_2 = 0$$

$$\downarrow$$

$$c_2 = 0$$

$$c_1 = 0$$

Echelon Matrix

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- r nonzero rows are independent
- r columns that contain the pivots are independent

Dependent or Independent?

- A set containing 0? $\emptyset$
- One nonzero vector? $\{I\}$
- Two identical vectors? $\{I, I\}$
- Two nonzero scalar multiples? $\{I, 2I\}$
- More than n vectors in $\mathbb{R}^n$

$$A_{m \times n}$$

$$m \leq n$$

$$A = \begin{bmatrix} 1 & 0 & 2 \\ 1 & 1 & 3 \end{bmatrix}$$

$$E \downarrow \begin{bmatrix} 1 & 0 & 2 \\ 0 & 1 & 1 \end{bmatrix}$$

$$\begin{bmatrix} 1 & 1 \\ 0 & 1 \end{bmatrix} \cdot I \rightarrow$$

$$m \leq n$$

$$2C_1 + C_2 = C_3$$

[short & wide]

$$n < m$$

$$(m-n)$$

$$Ax = 0 \text{ nontrivial}$$

Triangular Matrix

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$$\begin{bmatrix} 3 & 4 & 2 \\ 0 & 1 & 5 \\ 0 & 0 & 3 \end{bmatrix}$$

v_1, v_2, v_3

U

$$c_1 \begin{bmatrix} 3 \\ 0 \\ 0 \end{bmatrix} + c_2 \begin{bmatrix} 4 \\ 1 \\ 0 \end{bmatrix} + c_3 \begin{bmatrix} 2 \\ 5 \\ 3 \end{bmatrix} = 0$$

$$c_3 = 0$$

$$c_2 + 5c_3 = 0 \Rightarrow c_2 = 0$$

$$\Rightarrow c_1 = 0$$

Identity Matrix

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$$\begin{bmatrix} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{bmatrix}$$

I_4

$$c_1 = c_2 = c_3 = c_4 = 0$$

$$\begin{bmatrix} b_1 \\ b_2 \\ b_3 \end{bmatrix}$$

$$= b_1 \underline{e_1} + b_2 \underline{e_2} + b_3 \underline{e_3}$$

When $m < n$

- Set of n vectors in $\mathbb{R}^m$ must be dependent

$A_{m \times n}$

$[\equiv]$

$(n-r)$ special
variables

$\Rightarrow$ non trivial
solutions

When $m < n$

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Set of n vectors in $\mathbb{R}^m$ must be dependent
- $A_{m \times n}$ is a fat matrix

When $m < n$

- Set of n vectors in $\mathbb{R}^m$ must be dependent
- $A_{m \times n}$ is a fat matrix
- $Ax = 0$ has nontrivial solutions

$$\begin{bmatrix} 1 & 0 \\ 0 & 1 \\ 0 & 0 \end{bmatrix}$$

IND =)

Redundant

Spanning a space

If a vector space V consists of all linear combinations of $w_1, \dots, w_l$, then these vectors span the space. Every vector v in V is some combination of the w 's: $v = c_1 w_1 + \dots + c_l w_l$ for some c_i 's.

Spanning a space

If a vector space V consists of all linear combinations of $w_1, \dots, w_l$, then these vectors span the space. Every vector v in V is some combination of the w 's: $v = c_1 w_1 + \dots + c_l w_l$ for some c_i 's.

The c 's need not be unique (different combinations are permitted; spanning set can be large!).

Example-4

$$\begin{bmatrix} 3 \\ 4 \end{bmatrix}$$

$$A \xrightarrow{E} U$$

- Vectors $(1, 0, 0)$, $(0, 1, 0)$, and $(-2, 0, 0)$ span the xy -plane in $\mathbb{R}^3$

Column space: span of columns

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- $C(A) = \{Ax : x \in \mathbb{R}^n\}$

$$\begin{bmatrix} | & | & | & | \\ 0 & 0 & 0 & 0 \\ | & | & | & | \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \\ x_n \end{bmatrix}$$

Column space: span of columns

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- $C(A) = \{Ax : x \in \mathbb{R}^n\}$
- Space spanned by the columns of A

Independence + Span $\rightarrow$ Basis

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Consider $\begin{bmatrix} 1 \\ 0 \end{bmatrix}$ and $\begin{bmatrix} 0 \\ 1 \end{bmatrix}$

Independence + Span $\rightarrow$ Basis

- Consider $\begin{bmatrix} 1 \\ 0 \end{bmatrix}$ and $\begin{bmatrix} 0 \\ 1 \end{bmatrix}$

- They are independent and span $\mathbb{R}^2$

$\{ \quad \}$

A set $\{v_1, v_2, \dots, v_n\}$ is a basis for a vector space V , if it spans V and is linearly independent.

$\{ \dots \}$ $\in \mathbb{R}^n$

A set $\{v_1, v_2, \dots, v_n\}$ is a basis for a vector space V , if it spans V and is linearly independent.

Basis = enough vectors to generate everything, but no unnecessary vectors.

A set $\{v_1, v_2, \dots, v_n\}$ is a basis for a vector space V , if it spans V and is linearly independent.

Basis = enough vectors to generate everything, but no unnecessary vectors.

Every vector in the space is a combination of the basis vectors, because they span.

Basis expresses each vector uniquely

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

There is a unique way to write v as a combination of the basis vectors.

Multiple bases for the same space

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Consider $\left\{ \begin{bmatrix} 1 \\ 0 \end{bmatrix}, \begin{bmatrix} 0 \\ 1 \end{bmatrix} \right\}$ and $\left\{ \begin{bmatrix} 1 \\ 1 \end{bmatrix}, \begin{bmatrix} 1 \\ -1 \end{bmatrix} \right\}$

Multiple bases for the same space

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

- Consider $\left\{ \begin{bmatrix} 1 \\ 0 \end{bmatrix}, \begin{bmatrix} 0 \\ 1 \end{bmatrix} \right\}$ and $\left\{ \begin{bmatrix} 1 \\ 1 \end{bmatrix}, \begin{bmatrix} 1 \\ -1 \end{bmatrix} \right\}$
- Both span $\mathbb{R}^2$. Which is correct?

Multiple bases for the same space

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

Bases

- Consider $\left\{ \begin{bmatrix} 1 \\ 0 \end{bmatrix}, \begin{bmatrix} 0 \\ 1 \end{bmatrix} \right\}$ and $\left\{ \begin{bmatrix} 1 \\ 1 \end{bmatrix}, \begin{bmatrix} 1 \\ -1 \end{bmatrix} \right\}$
- Both span $\mathbb{R}^2$. Which is correct?
- Basis is not unique! A vector space has infinitely many different bases.

$\checkmark$ ind $\rightarrow$ removes redundancy
 $\checkmark$ span $\rightarrow$ cover every thing
 $\downarrow$
 $\{ \text{Basis} \} \rightarrow \{ \dots \} \quad \{ \dots \}$

What is common across different bases of a space?

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

The vectors in a basis are not intrinsic to the space. But the number of vectors in every basis is intrinsic.

Dimension of a space

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

Any two bases for a vector space V contain the same number of vectors. This number, which is shared by all bases and expresses the number of “degrees of freedom” of the space, is the dimension of V .

Dimension is the same despite different bases!

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

If $v_1, \dots, v_m$ and $w_1, \dots, w_n$ are both bases for the same vector space, then $m = n$. The number of vectors is the same.

$$\{v_1, \dots, v_m\}$$

$$m < n$$

$$\{w_1, \dots, w_n\}$$

→ Contradiction

$$Ax = 0$$

$$VAX = 0$$

$$W = VA$$

$$*x^m \quad m \times n$$

$$VAX = 0$$

$$w_1 = a_{11}v_1 + a_{21}v_2 + \dots + a_{m1}v_m$$

$$w_n = a_{1n}v_1 + a_{2n}v_2 + \dots + a_{mn}v_m$$

$$\begin{bmatrix} w_1 & w_2 & \dots & w_n \end{bmatrix} \begin{bmatrix} v_1 & v_2 & \dots & v_m \end{bmatrix} \begin{bmatrix} a_{11} & a_{12} & \dots & a_{1n} \\ a_{21} & a_{22} & \dots & a_{2n} \\ \vdots & \vdots & \ddots & \vdots \\ a_{m1} & a_{m2} & \dots & a_{mn} \end{bmatrix}$$

Zero matrix is exceptional!

- Column space is $\{\bar{0}\}$

Basis ?

{ }

$$\begin{bmatrix} 0 & 0 & 0 \\ 0 & 0 & 0 \\ 0 & 0 & 0 \end{bmatrix}$$

$O_{3 \times 3}$

Zero matrix is exceptional!

- Column space is $\{\bar{0}\}$
- By convention, the basis is $\{\}$ and dimension is zero

- The Four Fundamental Subspaces of a matrix!

Rough

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్
भारतीय प्रौद्योगिकी संस्थान हैदराबाद
Indian Institute of Technology Hyderabad

$$1) \left\{ \begin{array}{ccc} 1 & -1 & -1 \\ 1+x & x+x^2 & 1-x \end{array} \right\}$$

$$: \underline{P_2} = \{1, x, x^2\}$$

$$2) \begin{array}{ccc} & & \\ \sin^2 x & 1 & \cos^2 x \\ 1 & -1 & 1 \end{array}$$

$$\underline{a_0 + a_1 x + a_2 x^2}$$
